(57) Abstract :

Abstract The present invention related to a novel electronic iodine chamber. The staining of a TLC plate with iodine vapor is among the oldest methods for the visualization of organic compounds. It is based upon the observation that iodine has a high affinity for both unsaturated and aromatic compounds. This is electronic instrument. In this instrument at time more than 10 TLC can be stain. It is time saver instrument.

Complete Specification  
Title ELECTRONIC IODINE CHEMBER

Field of invention

The present invention related to a novel electronic iodine chamber,

Background of the invention

The utility model discloses a portable type iodine sampling device. The portable type iodine sampling device is composed of parts including an air inlet device, an aluminum-made machine box, an air outlet device, an electronic monitoring module, a second-order vacuum fan and the like. The portable type iodine sampling device adopts glass fiber filtering paper with high micro-particle collection efficiency and a carbon impregnated iodine filtering box. The portable type iodine sampling device is convenient to carry, light in weight, small in volume and low in installation and transportation costs.
