(57) Abstract :

The present invention relates to the Preparation and Pharmacological evaluations of silver nanoparticles prepared from the extract of stem bark of Plumeria rubra. The characterization of synthesized nanoparticles was carried out by UV- Vis spectroscopy, FT-IR analysis, XRD, SEM, entrapment efficiency, determination of particle size and Zeta Potential. Pharmacological evaluation of synthesized silver nanoparticles was performed. The synthesized silver nanoparticles showed a strong antiviral activity against HIV virus. Anticancer activity of synthesized silver nanoparticles was checked against MCF-7 breast cancer cell line by MTT assay. The results demonstrated that silver nanoparticles of Plumeria rubra stem bark extract exhibits excellent anticancer potential. Results also concluded that the that the silver nanoparticles prepared from the extract of stem bark of Plumeria rubra has shown excellent antioxidant, anticancer, antiviral, antibacterial potentials.
