FEEDBACK SYSTEM

The institution seeks feedback regarding its educational performance and ambiance from a variety of stakeholders, including students, teachers, employers, alumni, etc. and a report on the actions done in response to the feedback has been published on the institution's website.

Feedback Mechanism:

Stakeholders' constructive feedback is attained through carefully crafted both digital and printed feedback forms. The VmEdulife platform is used to collect variety of feedbacks like institute, alumina, course mid survey, course end survey, faculty, student research activities, infrastructures, industry visit, In plant training etc. Feedback from faculty, students, alumni, and employers is gathered, examined, and assessed by the IQAC during each academic year and confirmed the same by conducting meeting. The Principal is then informed of the reports. The Principal also makes additional corrections, recommendations and orders faculty members to make necessary corrections. The Chairman is presented with any further issues that call for management action, and he makes the appropriate judgments.

To improve faculty performance generally and their contribution to the expansion of the institute, constructive faculty feedback is received. The faculty's input on curriculum design, academic atmosphere, management policies, and other topics contributes to the improvement of the institute and fosters a better workplace culture. The Principal responds to faculty recommendations appropriately to implement corrective measures.

Students have the option of vocally or in writing or Online platform like VmEdulife software for feedback related to their general opinion about the facilities, including the mess, canteen, general hygiene, sanitation, and utilization of infrastructure, among other things. Students can also speak with the instructors personally, or if necessary, the principal. The authority takes immediate action to resolve problems. Additionally, the faculty receives feedback and, if necessary, is prepared for academic improvisations.

Alumni who are enrolled in graduate programmes or who are employed by businesses are also surveyed on the institution's influence on their career growth. In order to inform final-year students about new elements and prospects in the pharma industry, the college also invites alumni to share their experiences. The input from employers is thought to help students become marketable, increase their earning potential, and provide orientation for their future career paths. For the general improvement of pupils, a variety of companies are invited for campus placements, and even industry experts present lectures on current trends, leadership abilities, entrepreneurship, etc..
