

SCOPE

The proposed Seminar would provide a platform for live discussion on newer trends in role of red and green biotechnology in biotech products.

We aim to bring experts from the spectrum of backgrounds for exchange of ideas and experiences and networking. With more and more clinical trials and other clinical research activities being conducted in India, there is an immense need to understand the importance of biotechnology and how it impacts the life cycle of the product. By considering the problems and challenges facing the development of a robust biotechnology system for India, it is must to have an interactive session between pharmacy students, teachers, industrialists, experts from Pharmacy professionals

OBJECTIVES OF THE EVENT

- To provide a view on current scenario of biotechnology issues in India. It will provide different perspectives from key stakeholders such as Industry, Investigators, Regulators on current aspects of biotech derived pharmaceuticals and the way forward.
- To provide a platform for live discussion on newer trends in biotech and Indian regulatory system.
- Biotechnology. Collaborating with Pharma Biotech organizations in enhancing drug safety with advancements in information technology, there has been the emergence of new opportunities for national and international collaborations that can enhance postmarketing surveillance programs and increase drug safety. Building a network of Biotechnology with respect to medicines in India.
